EXPERIENCE

Hi! I'm a MacOS, iOS, and formerly windows, support advisor and technician, with more than 20 years of experience on the field. My career started suddenly when I left Architecture studies, which left me with a heavy luggage of digital art experience. I actually work as Genius for Apple Retail, at Oriocenter near Bergamo. I like my job and moreover I feel lucky for having the great opportunity to live everyday with those special persons my colleagues are. I like to see them grow up and feed their passions, I help whenever I can sharing my knowledge, coaching by example, smile and joke whenever is appropriate. I admire and prefer the kind of "mentor" over the "leader", the humble human over the alpha male, and the diversity (gender, race, religion) over the conformism.

DEVELOPER

Natural born learner, I started in 2011 to study C and algorithms, which has become my only passion in 2014 with the disclosure of Swift. Since then, studying whenever and wherever possible, I had some opportunity to exercise with static websites (html, css, vanilla javascript), Wordpress themes development, an iOS app for learning purposes (and a ton of Swift Playgrounds), and lately approaching Laravel and VueJS.

LOOKING FOR

The work environment I dream about is physical or remote, showing noticeable diversity, human values, tight teamwork, friendship, open feedback, oriented toward new technologies.

IN APPLE

2018	Lead and Learn - Internal training organization and scheduling
2014	In-Store Guest Trainer - Internal training organization and scheduling
2012	Market Core Facilitator - Internal training for new employees

LANGUAGES - FRAMEWORKS

HTML	CSS	JAVASCRIPT	TYPESCRIPT
PHP	MYSQL	SWIFT	LARAVEL
VUE JS	WORDPRESS	VS CODE	XCODE

PERSONAL WORKS AS DEVELOPER

Of course in my learning journey I wrote a ton of code, sometimes for me or supporting other people's work. However, even if only as second job, my passion led me to at least 3 finished jobs I did and I'm glad to show in this resume.

ZELANDIA TRAVEL (WORK IN PROGRESS)

A website for a Tour Agency, written in VueJS as a PWA. The backend for data and the admin page in Laravel and a faster API served by a Vapor/Swift server.

THIS RESUME AS WEBSITE

Willing to show some skills for an interview, I started this website in 2 half-days, very quick and dirty :] , using VueJS. The source code is on Github at https://github.com/paulicelli/sabino.paulicelli.com.

SURFLANGUAGE

A website for a Linguistic / Surf School, coded in PHP, multilanguage strings served by an SQLite database.

MESC: MINDFULNESS EXPERIENCE SAMPLING FOR CHILDREN

An iPad app made for a psichological study on children. Made using Xcode and Swift.

PANFRUTTA

My very first finished website, made for a friend using Bootstrap.
